Subject: D.O.J. vs Microsoft Case

I would encourage the Department of Justice to accept the Microsoft proposal to donate computers/funds to schools and end this case.

I believe it is most IMPORTANT to let Microsoft move forward to create more communications software for people all over the world to share medical, scientific, and all other knowledge.

To continue legal proceedings and delay progress in worldwide communications is reprehensible. There is no other group as dedicated or as capable to continue this project for all humanity.
